EXAMINER'S AMENDMENT and REASONS FOR ALLOWANCE

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gordon Lindeen on 09-09-2005.

The application has been amended as follows:

In the claims:

Cancel claims 10, 11, 15 and 20.

In claim 1, line 12 (the last line): replace "undocked." with -- undocked, wherein the CPU is to operate at a higher frequency and at a higher voltage when the device is docked than when the device is undocked. --.

In claim 12, line 5: replace "undocked." with -- undocked, wherein the CPU is to operate at a higher frequency and at a higher voltage when the CPU operates as a system CPU of the notebook computer than when the CPU operates as a system CPU of the core computer.--

In claim 17, line 10 (the last line): replace "system." with -- system, wherein operating the CPU

as a system CPU of the notebook computer includes operating the CPU at a higher frequency and voltage than when operating the CPU as a system CPU of the core computer. --.

2. Claims 1-5, 7-9, 12, 14 and 16-19 are allowed.

The following is an examiner's statement of reasons for allowance:

Reference Eisele et al. (US Patent 6,089,459) teaches an electronic device (smart diskette) having a CPU and an operating system (col. 7 lines 63-67) which can be docked into a notebook computer (PIU) having additional modules/functions and an operating system wherein the CPU of the electronic device operates as a system processor of the notebook computer when the device is docked and operates as a system CPU of the device when the device is undocked (col. 13 lines 5-25). However, Eisele does not teach the CPU operates at a higher frequency and at a higher voltage when the device is docked than when the device is undocked.

The claims include the limitation of the CPU is to operate at a higher frequency and at a higher voltage when the device is docked than when the device is undocked, which is not shown by the prior art of record in the combination as disclosed and claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure, as the art discloses smart diskette device having a CPU which can operate alone when the device is undocked and operate as a system CPU of the computer when docked:

US Patent 6,089,459 Eisele et al.
